Professional Summary

AI & Machine Learning engineering student with strong academic performance (CGPA 9.02/10) and hands-on experience in AI, IoT, embedded systems, and software development. Passionate about building intelligent systems that solve real-world problems through machine learning, computer vision, automation, and sensor integration.

Education

Presidency University, Bangalore
B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)
2024 - 2028
CGPA: 9.02/10

Technical Skills

Python, HTML, CSS, Arduino, ESP32, Problem Solving, Leadership

Projects

- Smart Fire Detection System** using AMG8833 Thermal Camera, ESP32 and MQ2 Gas Sensor. Developed an IoT-based fire detection system capable of thermal monitoring, smoke detection, and heat-zone localization. Led system design and integration. Selected among Top 70 innovative projects.
- Leaf Disease Detection System (AI/ML).** Built an AI-powered plant disease detection solution using machine learning and computer vision techniques.
- Sam AI Assistant.** Developing an intelligent personal assistant web application integrating AI capabilities.
- Multiplayer Tic-Tac-Toe Web Application.** Developed a multiplayer web-based game with real-time interactions.

Certifications

EY Microsoft AI Skills Passport (2026)
Covered AI fundamentals, responsible AI, sustainability, business applications, and employability skills.

Leadership & Activities

Class Representative (Semester 4).
Led project teams and hackathon groups while coordinating communication between students and faculty.
